If you're working with a window that's set underneath a roof overhang, certain window awning designs or otherwise protected from weather, for example, you may not want to spend the extra time and money to weatherproof.CC0/paulbr75/Pixabay Rough Opening Versus Window SizeMake sure the window you buy isn't the exact same size as the rough opening. That's why it's important to know the exact names for all the parts and tools you'll need. Useful when the Remote Desktop controls are embedded in another (host) program.NoteCtrl+Alt+Break and Ctrl+Alt+End are available in all Remote Desktop sessions, even when you've set up the remote computer to recognize Windows keyboard shortcuts. Depending on the scope of your installation, you may end up exposing some insulation in the walls. The first section contains all new shortcuts in Windows 7. The article there is about the beta version, but I suppose not much has changed since then. Use temporary nails to hold it in place.CC0/BrooklynJohn/Pixabay Level Is Part of FitWhile your window is held in place with temporary nails, use a spirit level on the bottom sill to make sure the window is level and square. Water-damaged insulation should be removed and replaced, and if there doesn't appear to be enough around the windows, you can supplement it.CC0/AKuptsova/Pixabay Think About Water Incursions With Each StepWindows are an easy point of entry for rainwater and other moisture, which can cause serious damage to your home. If you've got the budget, consider hiring a contractor to oversee the work. Asymmetrical windows will look sloppy, so be sure not to skip this step.CC0/jarmoluk/Pixabay Consider Calling a ProfessionalAs you can see, there are a number of potential issues you can run into while installing a window, including some that can have long-term implications for your home's value. If you want to create your own hotkeys, you should try the free keyboard shortcut tool AutoHotkey. Otherwise, it may not fit.
